Description

A website created for potential clients, who are looking for an attorney.

Information includes background information on Attorney Williams, past client feedback, contact information, and specific services provided by this law firm.

A separate database exists where the attorney can store, access, edit, and update specific client information.

The data is hidden behind a login screen that requires an administrator's login information.

Features

Checking posts to ensure each person only posts once.

Checking client input for duplication.

List of reviews and list of clients which can be added to

Planning - User Stories

Created the website since Attorney Williams currently does not have a website available for clients to research information on her.

Useful for clients seeking an attorney well verses in domestic relations and municipal laws in the state of Missouri.

Perfect place for keeping secure information on clients with easy access to the data from anywhere.

Planning - Database

A database for storing the reviews created by past clients, administrator login information, and client information.

Admin functionality available for reviewing, rejecting, and accepting client reviews. Moreover, the administrator is able to access, create, edit, and delete client information. Changing the login information is another feature exclusively available to the administrator. A few changes will be instituted as my client sees and requests different features.
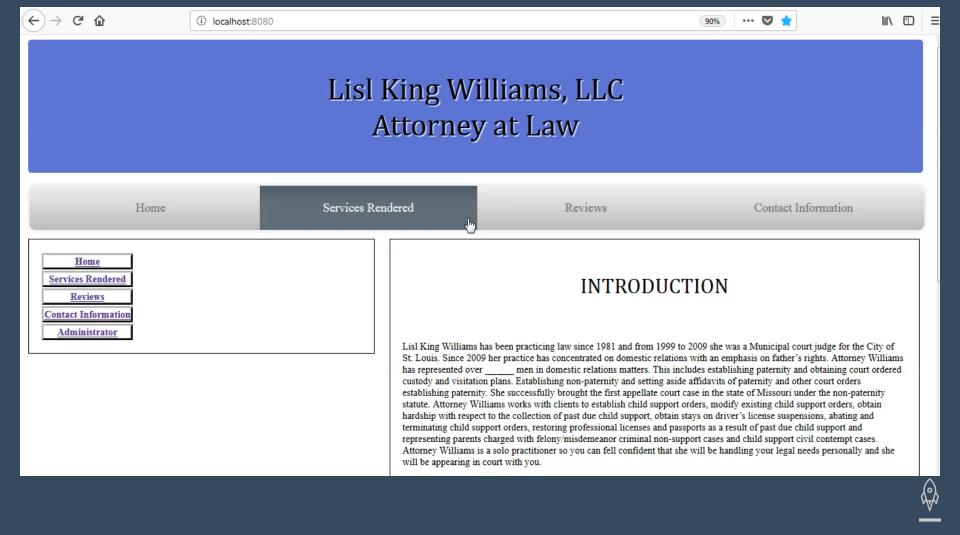

User functionality is limited to posting a comment and review of Attorney Williams' professional performance.

INTRODUCTION

Lisl King Williams has been practicing law since 1981 and from 1999 to 2009 she was a Municipal court judge for the City of St. Louis. Since 2009 her practice has concentrated on domestic relations with an emphasis on father's rights. Attorney Williams has represented over _____ men in domestic relations matters. This includes establishing paternity and obtaining court ordered custody and visitation plans. Establishing non-paternity and setting aside affidavits of paternity and other court orders establishing paternity. She successfully brought the first appellate court case in the state of Missouri under the non-paternity statute. Attorney Williams works with clients to establish child support orders, modify existing child support orders, obtain hardship with respect to the collection of past due child support, obtain stays on driver's license suspensions, abating and terminating child support orders, restoring professional licenses and passports as a result of past due child support and representing parents charged with felony/misdemeanor criminal non-support cases and child support civil contempt cases. Attorney Williams is a solo practitioner so you can fell confident that she will be handling your legal needs personally and she will be appearing in court with you.

What I Learned

- Google maps
- Spring Boot Security
- Using sessions with Java
- CSS hover command
- The importance of making a website visually pleasing and easy to navigate
- How user stories work

What's Next

- Email trigger for when someone wants to post a review.
- Placing posts in the pending category before adding them to the review database.
- List of reviews and list of clients which can be edited or deleted.
- Finishing the logout feature.
- Finding a server to host the website.
- Finishes inputting the information for the different webpages.
- Add sorting ability for client list.
